MATE130018	专业英语 (材料物理)	学分: 2	周学时: 2
	English for Materials Physics Majors	总学时: 36	
预修课程: 半导体物理 C、器件与集成电路原理、电子材料与器件原理			
修读对象: 本科四年级学生			

中文课程简介(150字以内)

专业英语(材料物理)这门课程汇编了英语原版的半导体物理、集成电路器件原理与工艺、薄膜制备、真空技术等方面的基本知识,通过课堂讲授、提问互动、阅读理解、听力练习等方式让学生掌握相关领域的词汇,提高专业领域中的英语交流能力。

FUDAN UNIVERSITY

英文课程简介

The course of English for Materials Physics Majors introduces the basic knowledge of physics of semiconductors, the theory and processing of integrated circuit, thin film preparation, vacuum technology in English. By way of class giving, question and answer, reading comprehension and listening comprehension, this course makes students familiar with the words and expressions in related areas. It also helps students to improve their communication capability in English.
