

MATE130060	材料结构与性能	学分：4	周学时：4
	Structure and property of organic and inorganic materials	总学时：72	
预修课程：《普通物理》；《普通化学》			
修读对象：材料科学系学生			

中文课程简介（150 字以内）

《材料的结构与性能》课程涉及无机材料、分子材料和高分子材料等三方面内容。要求学生熟悉有机和无机材料的基本结构以及结构和性能的关系。

英文课程简介

Structure and property of organic and inorganic materials deals with molecular, macromolecular and inorganic materials *etc.* Students are expected to be familiar with fundamental structures of organic and inorganic materials and relations between structures and properties.

The course is intended for students majoring in materials science.
